

### LAMISIL USAGE INSTRUCTIONS

Please use the following instructions if prescribed Lamisil 250 MG, one tablet daily.

1. Get initial blood work for a baseline liver function test. A lab order for bloodwork is provided during your office visit.
2. Once our office receives your lab results, we will call and let you know whether or not you can begin taking Lamisil.
3. Fill the prescription and begin taking the Lamisil.
4. Six (6) weeks after starting the Lamisil, you must have another blood test to recheck your liver functions. An additional order for the second set of bloodwork is provided during your office visit.
5. Make a follow up appointment to be evaluated at the office one week following the second blood test.
